The G30 bulbs are beautiful, incredibly durable, and perfect for any occasion.

With their elegant, round lens, these bulbs are less noticeable in daylight, making them versatile for year-round use.

They are both water and corrosion resistant, at only 0.45W per bulb they offer superior brightness and stability.

The round shape provides flexibility for using any time of the year from rooflines at Christmas to overhead dancefloors at weddings.

They also look great hanging over the backyard patio and wrapping large trees.

FEATURES:

- **Water Resistant:** Epoxy-glued base with rubber o-ring seal.
- **Condensation Prevention:** Minimal air space above the LED.
- **Corrosion Resistance:** Triple-plated nickel stub.
- **Light Dispersion:** Optical cone refracts light across 270 degrees.
- **Brightness:** Three SMD LEDs combined with a magnifying lens.
- **Low Power Consumption:** 0.45 watts.
- **Color and Brightness Over Time:** High-grade components combined with 3 LEDs provide lower internal temperatures and industry-leading stability in color and brightness.
- **Discrete Appearance:** Round lens looks great any time of the year.
- **Replaceable Bulbs:** Independent bulbs for easy color pattern customization.
- **UV Resistance:** Enhanced plastic stabilizers to prevent discoloration from the sun.

Extra discreet, these small G20 bulbs are a great choice for holiday installations and other festive occasions alike.

They can be used on rooflines or in trees.

High-quality components and modern LED chips ensure that these bulbs are manufactured with longevity and weather resistance in mind so you won't have to replace your lights every year.

FEATURES:

- **Water Resistant:** Epoxy-glued base with rubber o-ring seal.
- **Condensation Prevention:** Minimized air space above the LED.
- **Corrosion Resistance:** Triple-plated nickel stub.
- **Light Dispersion:** Optical cone refracts light across 270 degrees.
- **Brightness:** Two SMD LEDs combined with a magnifying lens.
- **Low Power Consumption:** 0.37 watts.
- **Color and Brightness Over Time:** High-grade components combined with 2 LEDs. provide lower internal temperatures and industry-leading stability in color and brightness.
- **Discrete Appearance:** Small round lens suitable for use any time of the year.
- **Replaceable Bulbs:** Independent bulbs for easy color pattern customization.

The C9 Bulbs are holiday classics that emit vivid colors and feature sparkling faceted lenses.

They are a direct replacement for traditional incandescent bulbs, offering a higher level of durability and electrical efficiency.

Perfect for rooflines and large trees, their industry-leading brightness and stability will bring festive cheer year after year.

FEATURES:

POLYCARBONATE LENS

Contains UV Stabilizers

OPTICAL CONE

Refracts light to brighten all angles up to 270 degrees

SMD LED CHIPS

3x SMD LED chips at 0.45W, allow for longer runs of wire

HIGH GRADE SILICONE PLUG

Soft silicone seal secures against moisture

NICKEL PLATED BASE

Helps resist corrosion

COPPER FOOT

Triple nickel plated to further resist corrosion

A traditional festive bulb, this strawberry-shaped C7 features a faceted lens for sparkle and high visibility.

Use them for lining windows, wrapping trees, or a more discrete roofline look. High quality components and modern LED chips mean these bulbs will shine brighter for longer, in any weather.

These lights add the perfect accent to shrubs, bushes and patios.

The brightly lit LEDs are energy efficient, with 270-degree light dispersion, thanks to the cleverly designed inverted cone in the lens.

These lights are built to last, with durable and waterproof construction to withstand rain, snow, and cold temperatures.

The coaxial connection system features a watertight connection with a rubber O-ring, eliminating corrosion issues.

They're seamlessly end-to-end connectable, so you can create a display that shines without worrying about them pulling apart easily.

With a stunning array of colors that shine bright, these mini lights are sure to bring sparkle to any display.

Use them to wrap trees and shrubs, or anywhere else you want to add some magic.

They are built with durable and water-resistant construction that withstands rain, snow, and cold temperatures.

The mini lights coaxial connection system features a watertight connection with a rubber o-ring, eliminating corrosion issues and disconnection from wind.

They're seamlessly end-to-end connectable that, when combined with their power efficiency, allows you to decorate large trees without having to supply a second power source.

FEATURES:

- **Water Resistant:** Water-tight plugs and one-piece molded construction seal out water, preventing electrical issues and corrosion.
- **Wind Resistance:** Plugs screw together securely and won't pull apart in strong winds.
- **Stability:** 99.9% copper sourced from Europe, LEDs from Taiwan, resistors from Japan – all contribute to the most stable 120V LED decorative lights on the market.
- **LED Quality:** LEDs maintain their brightness longer and won't discolor.
- **PVC Casing:** Sourced from the USA, withstands the elements and UV exposure.
